

Welcome To,

T.G - BLOCKS

A platform assists beginners in understanding the logic behind algorithms without the complications of programming language syntax and without the distraction of compiler errors.

set Count to 1

repeat while Count ≤ 10

do

print “ Welcome To TG-Blocks ”

set Count to Count + 1

Python English

Count = None

Count = 1

while Count <= 10:

print('Welcome To TG-Blocks')

Count = Count + 1

What is TechGeeks Blocks ?

TG Blocks is a platform aims to bridge the gap between algorithms and programming languages. It offers a visual representation of algorithms alongside their corresponding code in multiple programming languages.

Block-Based Code Generation

Visualized Code

Easy-to-use

Everyone can contribute
